with \varnothing 40 mm diaphragm aerator

Item	Colour	\varnothing Hole mm
AMG40	grey	32-40-50
AMG100	grey	100-110
TAVG40	grey	40

Description: Diaphragm aerator

Material: PVC plastic

Features: Our aerators have an elastomeric membrane inside, the upper part of which is in contact with the air from the downflow, and the lower part in contact with the ambient air. The membrane ensures the tightness of odors coming from inside the hatch and at the same time perfect ventilation.
